WORK EXPERIENCE

System Engineer Infosys

07/2021 - Present

Pune, India

About

- In Infosys, I worked on two different projects, both Bank of America (**Bofa**) projects. The first thing, I gain in Infosys is how to communicate with clients as we connect to Bofa clients on regular basis.
- In the first project, we used to receive raw data from the vendor, and we create feed files and **XML** files and load the data in the Toad. For all this process, I used oracle, GitBash/Eclipse, Putty, BitBucket, Jenkins & Toad. Another task is to track errors before implementing the files.
- In the second project, designing multi-feature modules of high quality both on the client-side and server-side, inter-team collaborations over chunky projects, and migration of legacy products to newer tech like react.
- I also did multi-project delivery in a defined timeline for all this, I learnt **HTML**, **CSS**, **Javascript**, **Reactjs**, Bootstrap/Semantic UI/Material UI, BitBucket, GitHub, and also created user stories in Jira.
- Working effectively in both independent and team environments to exceed the IT Goals.

PERSONAL PROJECTS

TextUtils (React.js)

- TextUtils is a word counter and a character counting utility which can be used to manipulate your text in the way you want. You can remove extra spaces, copy the manipulated text.
- You can convert your text from Uppercase to lower Case, clear text, lower to Upper Case, sentence Case. A toggle Mode given to change the theme of the page. It is based on HTML, CSS, javascript & reactjs.

Movie Search (React.js)

- Created a one page website where you go & and search movie by name then numbers of result occurs. I used HTML, CSS, Javascript & reactjs.

Portfolio (HTML, CSS & Javascript)

- The portfolio has my intro, contact details(a form for submitting the details of the contact person), passport-size photo, resume, **and some** of my projects linked & coming project plans with an attractive glance. Right-bottom side has icons to direct reach me on social media (icons of LinkedIn, Mail, and Instagram).

Travel Agency(HTML, CSS, Javascript)

- The travel website is about the travel tickets/ packages booking, you have to sign in for the further procedure. All details about the agency are in about us, location, contact form & more. We also attached the picture of the beautiful trip in our gallery, you can hover to get more details on it.
